

Youth Digital Arts

www.YDACS.com

Innovation, Inspiration, Aspiration

Our online and self-paced courses allow students from third grade through high school to explore the digital arts from the basics, with no experience required, to advanced digital art that pushes the boundaries of digital art software. You can view amazing student digital art in our [Blog](#) and read [testimonials](#) from Moms, students, and teachers.

Our courses are grouped into the three tracks shown below. Courses build upon one another, reinforcing skills taught in the preceding class and teaching additional advanced skills. All of the art forms also integrate with each other across the tracks.

Each course is entirely online, available 24 hours/day, fully supported, and completes with a student digital art portfolio of class works and a student activity report. Each course is 60 days long and costs \$155. Our High School Visual Arts course is twice the length and price. The software taught is professional level and free to install on as many computers as you wish and updates are free. DA101 is the only course with a small fee for the software.

Please download & print our [Course Catalog](#) for all information regarding our courses and programs.

Digital Drawing and Painting, Photo Painting, and 3D Drawing Track
